Notes:

1.) Airports with 2 runways have the larger one with bold numbers, e.g. **05** / 23 L / R means that the runway 05L / 23R is the larger one or if you see 109.10 (**02L**) means that the larger runway (and specific the runway end 02L) has an ILS LOC with frequency 109.10.

2.) At aircraft carriers the LSO frequency is for future usage. Not working right now.
